PROFESSIONAL EXPERIENCE

Independent Website Designer & Developer — NOV 2024 – PRESENT

- Design and build business, service-based, personal, and marketing websites across diverse commercial sectors, with experience spanning 26+ websites.
- Translate business requirements into clear website structures, content hierarchies, and user journeys informed by project discovery and competitor research.
- Deliver responsive Arabic and English website experiences, with attention to RTL/LTR behavior, content presentation, and cross-device usability.
- Select implementation methods according to project requirements, combining custom front-end development with Webflow, Wix, Framer, and GoHighLevel.
- Build interactive visual experiences and apply integration, SEO, performance, and quality-assurance fundamentals where relevant.

White-label Website Developer | Go Online — JUN 2026 – SEP 2026

Four-month white-label collaboration with a Gulf-based digital agency.

- Built and implemented websites for the agency's clients across different commercial sectors as part of its website delivery workflow.
- Translated project requirements and agreed specifications into functional website implementations for a varied client portfolio.

SELECTED PROJECTS

Al Awad Residential & Commercial Solutions | Contracting & Commercial Services | **AGENCY COLLABORATION**
Implemented a bilingual Arabic/English website for a Kuwait-based contractor, organizing multiple service divisions into a clear business-facing structure. Contribution focused on implementation based on agency-approved design specifications. View project

Safeer Al Oamara | Retail & Traditional Menswear | **AGENCY COLLABORATION**
Built an Arabic website experience for a Kuwaiti traditional menswear business, organizing product and collection presentation around direct customer inquiries and WhatsApp ordering. View project

Mithaq | Legal Website Concept | Legal & Professional Services | **INDEPENDENT CONCEPT**
Developed an Arabic legal-services website concept with a distinctive visual direction, immersive 3D elements, and motion-led interactions. View project

WORKING APPROACH

Research & Discovery → Strategy & Structure → Design & User Experience → Development → Testing & Optimization
